Traditional design

SilentDrive™ | Garage door opener

Convenience, style, security

... because we care about you and your family

Bringing you the latest in German engineering and manufacturing excellence. SilentDrive™ garage door openers give you:

- Smooth and quiet performance
- Long-lasting functionality
- Maximum convenience
- Unique safety features
- Peace of mind that you deserve

The SilentDrive™ opener series complies with current UL 325 requirements, and is designed to meet future 2008 UL requirements.

Actual size of the standard 4-button mini transmitter

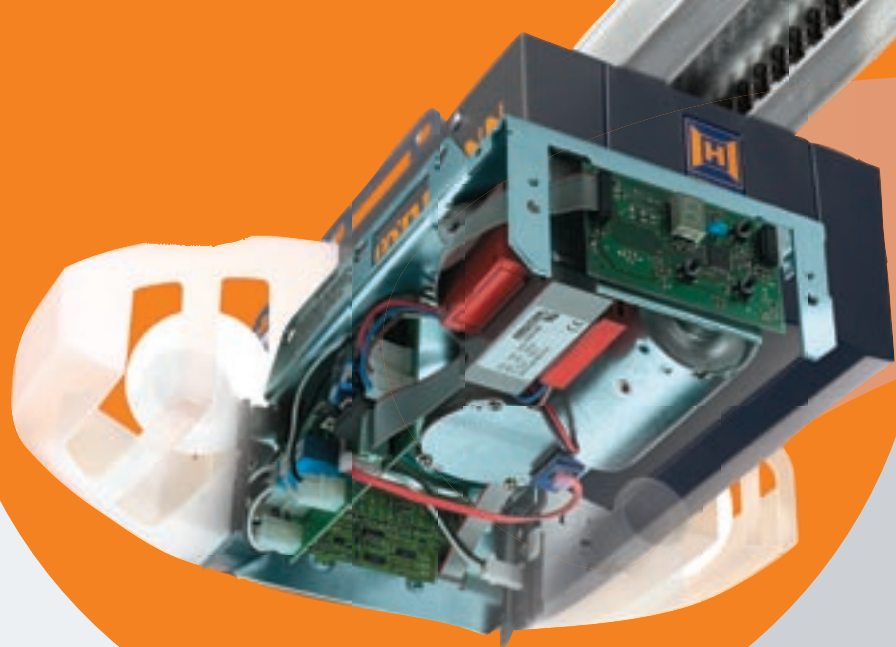

SilentDrive™

DC motor Belt Drive System

SilentDrive™ openers are built with a DC motor and come with a belt drive system. The DC motor and Belt Drive System make for very quiet operation, dramatically enhancing your total quality experience.

Dual light bulbs and off time delay

Features dual bulbs and lens covers enhancing the lighting in your garage while you enter or exit your garage. A 3 minute auto delay shuts your lights off automatically.

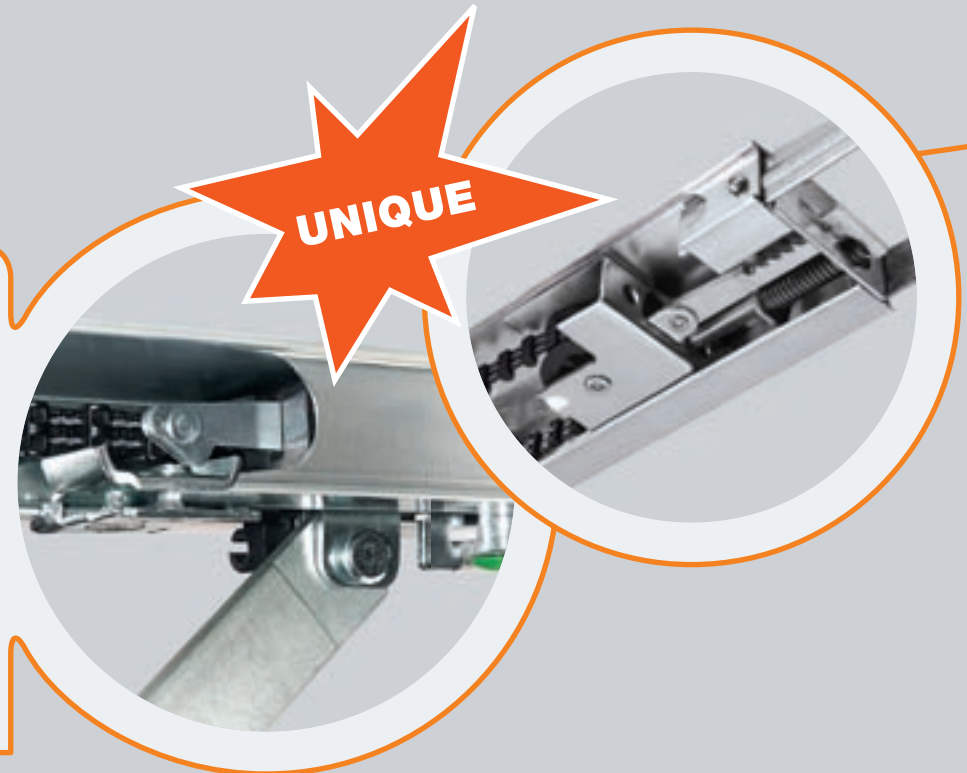

Hörmann – Unique Features

Beltension Guard™

This built-in feature automatically maintains proper belt tension for the life of the opener to ensure quiet and trouble free operation while eliminating costly and inconvenient service requirements.

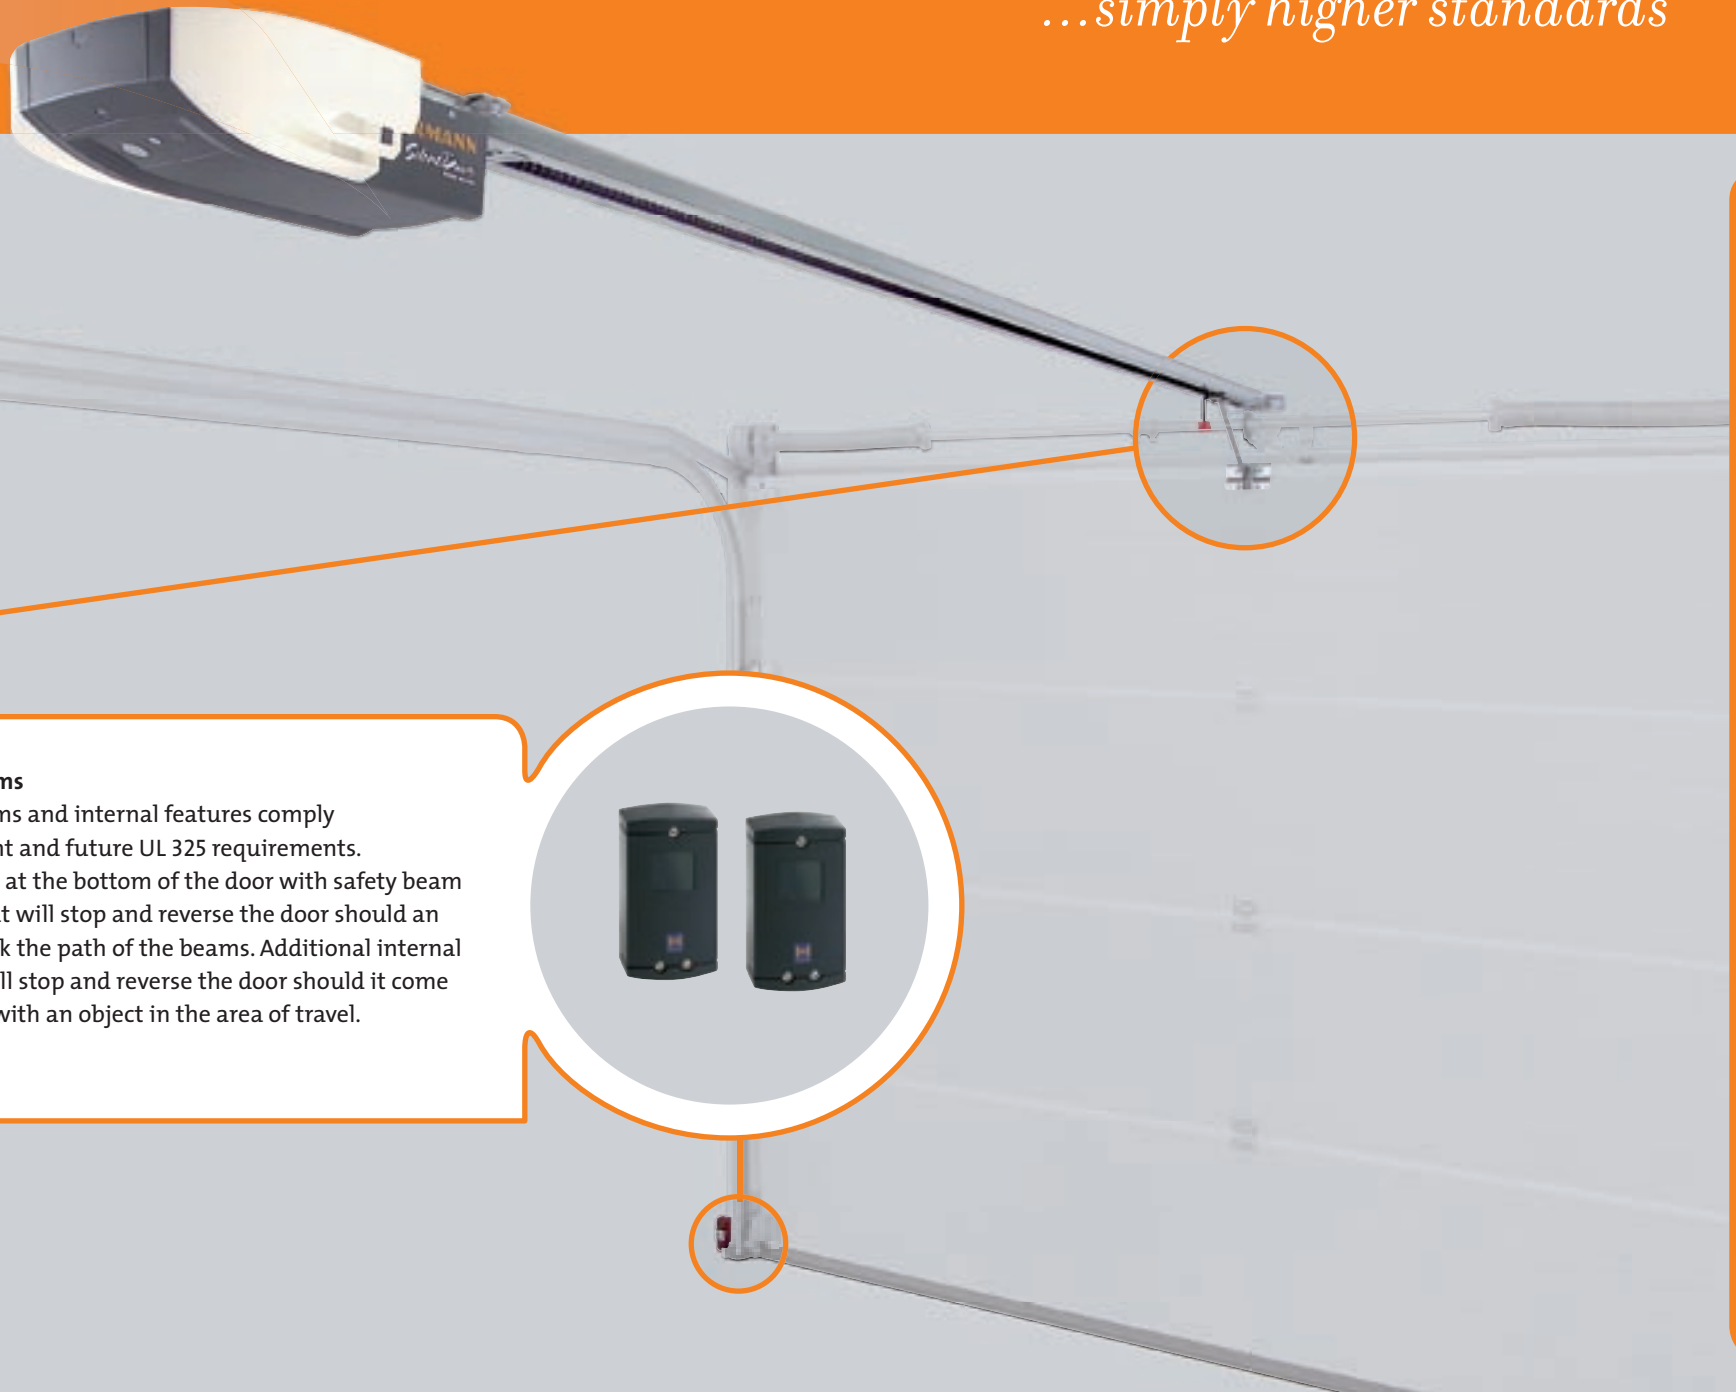

EngageLock™

Always feel safe with the unique EngageLock™. This built-in feature eliminates door back drive action in the event of a power loss.

SilentDrive™

...simply higher standards

Safety Beams

Safety Beams and internal features comply with current and future UL 325 requirements. Safeguards at the bottom of the door with safety beam sensors that will stop and reverse the door should an object break the path of the beams. Additional internal features will stop and reverse the door should it come in contact with an object in the area of travel.

SilentDrive™

Limited
LIFETIME
WARRANTY

SilentDrive™ 5500 series

- Ultra quiet operation

SilentDrive™ 7500 series

- Ultra quiet operation
- Accelerated opening

Standard transmitter and wall control

4-button mini transmitter

A compact single transmitter device allows you to conveniently operate as many as four separate openers from the security of your automobile.

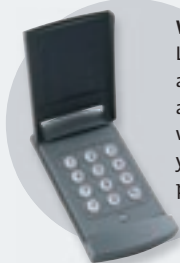

Wall Control

This illuminated control device operates your door from inside of your garage and is easy to find in a dark garage.

**For doors 12' high
ask for SilentDrive™ 8500**

Opener options

Wireless Keypad Entry System

Lighted and covered keypad allows for easy remote access to your garage without wiring and with your own programmable personal security code.

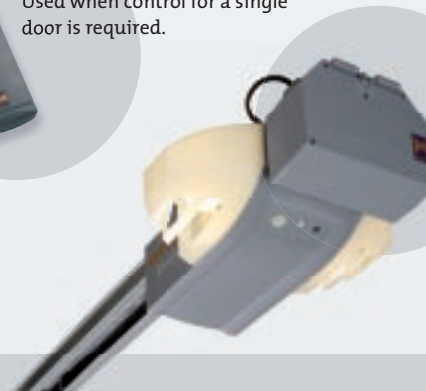

Deluxe Wall Console Station

Operates the door from inside your garage door and independently operates opener lights. A separate on/off switch for "vacation mode" allows you to disable the garage door opener for extended periods of time.

Single Button Door Control

Used when control for a single door is required.

Battery Pack

(available on models 7500 and 8500 only)

Allows for continued use of the garage door opener and all safety systems in the event of power disruption to your home. Up to 65 full cycles within 24 hours of power loss and 5 full cycles after 18 hours of standby mode operation after power loss.
